

District 5 – Laura Davidson

1. My interest in the Rutherford County Commission seat is based on my lengthy involvement with the local community and lack of presence or voice regarding current representation, simply being notified by media sources after a vote with no prior knowledge of its occurrence is unacceptable when it affects taxpayer dollars. I also realized my current representative has been in this seat for 30 years and I absolutely believe in term limits. To represent ones community one must be present more than just on an election year.
2. If elected I want to be part of the positive resolution to the landfill situation, ensure this county is providing quality education for ALL children and while we are one of the fastest growing counties in the state I want to ensure we are offering quality over quantity residential choices that aren't detrimental to our infrastructure.
3. I would like to be on the Health and Education Committee to ensure we are providing top tier health and education for ALL children throughout the county. I would like to be on the Planning Committee to ensure we are providing quality well planned growth rather than rampant expansion.
